

**Prevent Meningitis  
Prevent Pneumonia**

**Don't wait. Vaccinate!**

**One child dies every minute  
from Pneumococcal disease**  
according to the World Health Organization!

*Prevent*  
Pneumococcal disease

**Remember, 2 - 6 August is  
Worldwide Vaccination Week!**

**The only thing we need is for every child to grow up healthy.**

Pneumococcal disease is responsible for the deaths of up to 1 million children every year. Serious diseases often caused by pneumococci include pneumonia, pneumococcal meningitis, blood and ear infections. Some of these infections can lead to

hearing loss, some paralysis and others to death. The Department of Health is running a National Immunisation Programme with support from Pfizer.

**When your child is 6 weeks old go to your local clinic and help prevent Pneumococcal disease!**

Pfizer Laboratories (Pty) Ltd, 65 Sank Lane, Sandton, 2146, P.O. Box 762270, Sandton, 2146, Pfizer Call Centre: 0860 Pfizer (734 937), www.Pfizer.co.za. Further information is available on request from Pfizer Laboratories (Pty) Ltd, or can be found in the currently approved package insert.
